NATURAL  
BEAUTY KICK**

- 100 % vegan
- 100 % natural
- Animal-free
- Microplastic-free
- Pesticide-free
- Allergen-free
- Palm oil-free
- GMO-free

# Glucosamine is good. Vegan even better.

As a natural component of hyaluronic acid, glucosamine plays a crucial role in skin care. No longer an insider tip, it is developing more and more into an indispensable vegan superstar in the cosmetics.

Our glucosamine is produced by fermentation from maize – a natural kick for the skin.

## So mega vegā.

It is incredibly versatile and thanks to its gentle action ideal for sensitive and dry skin types.

Our vegan Glucosamine is available as N-Acetyl-D-Glucosamine, Glucosamine HCL, NaCl or KCl.

We look forward to support you.

## ANTI-AGING-EFFECTS:

- Supports the natural formation of the body's own hyaluronic acid.
- Improves skin moisture sustainably.
- Smooths the skin and reduces wrinkles.
- Strengthens skin elasticity.
- For an even complexion.
- Supports the reduction of hyperpigmentation.
- Reduces keratinisation disorders.
- Is well absorbed by the skin.
- Accelerates the renewal of the skin surface.
